Introduction

The QuantumAI token (QAI) is a native token on the Cardano blockchain. QAI provides an ease of use and store of value peer to peer token that allows for fast and border-less financing, better scalability and security.

QuantumAI utilizes the Cardano platform to unlock hidden values between individuals and retailers, allowing for secure payment transactions and data storage.

Cardano is a Blockchain platform for change makers, innovators, and visionaries, with the tools and technologies required to create possibilities for the many, as well as the few, and bring about positive global change.

Cardano is a proof-of-stake blockchain platform: the first to be founded on peer-reviewed research and developed through evidence-based methods. It combines pioneering technologies to provide unparalleled security and sustainability to decentralized applications, systems, and societies. Read more about Cardano at cardano.org.

Random Giveaways: Since the QuantumAI token mint on February 7th, 2022, QAI tokens have been randomly gifted to members of the Cardano community, sometimes just to say thanks.

Community Voting: QuantumAI will need to ask the community what they want to do, so are allocating these tokens for voting.

Liquidity/ Dex: Early QuantumAI adopters need a place to trade QAI, so we're listing QAI on DEX's and making markets with this allocation.

Miscellaneous i.e. Stake Pools: Tokens have been allocated to getting both token distribution efforts as well as staking underway and on an ongoing basis.

Events / Giveaways / Community: We're 100% sure there will be fun ways to get involved with QuantumAI in the future, so these tokens are set aside to encourage engagement.

Marketing: We are currently reaching out to marketers to help our token gain more traction.

Dev / Support: These tokens ensure development stays at the forefront as we build new apps and the Blockchain landscape continues to evolve.

Founders/Admin Team: These token rewards are for the Founders and Admin team for the risk they're taking and all their hard work. These tokens are vested, eligible for release at a maximum of 1 % annually beginning June 2023.

TBD: These tokens are not currently allocated but remain as "Treasury Reserve" should an acquisition, partnership, or other unforeseen market opportunity arise.
